(505)249-1657  
Phoenix, AZ

Analytical thinker and collaborative problem solver who transforms complex data into clear, actionable insights using storytelling and visualization. Proficient in Python, SQL, and data visualization tools, with a demonstrated ability to drive decision-making through structured analysis. Experienced in high-pressure environments and cross-functional teams, with a focus on delivering human-centered solutions that boost engagement and performance.

## EXPERIENCE

### Data Analyst Trainee

Career Foundry | Oct. 2023 – present

- Developed data-driven dashboards and reported solutions to support decision-making across areas ranging from medical staffing to business operations. Collaborated with interdisciplinary teams to align analytics with organizational goals.
- Spearheaded end-to-end data processes, from identifying stakeholder needs to designing relational database schemas, loading data into RDBMS, and using SQL to generate actionable insights.
- Applied tools including SQL, Python, Tableau, and Excel to collect, clean, and analyze large datasets, transforming raw information into meaningful visualizations and reports.

### Restaurant Server

Isleworth Country Club, Orlando, FL | Feb.-Sept. 2023

- Delivered tailored service to elite members, including pro athletes, executives, and public figures, requiring discretion, adaptability, and sharp attention to detail.
- Honed relational awareness and anticipated complex needs while coordinating seamlessly with culinary and leadership teams to fulfill high-expectation requests.

Sixty Vines, Orlando, FL | April 2020 – Feb. 2023

- Opened and operated during the height of COVID-19, quickly adapting to shifting protocols while maintaining a welcoming and efficient guest experience.
- Strengthened communication and decision-making under pressure in a dynamic, rapidly growing operation.

## Bartender/ Manager

High Noon Restaurant and Saloon, Albuquerque, NM | Sept. 2015 – Feb. 2020

- Led front-of-house service in a high-volume setting with fluctuating demands, balancing operational leadership with focus on guest needs.
- Oversaw nightly operations, resolved challenges in real time, and maintained team coordination and consistency.

## Technical Skills

Data Analysis, Python – Visualization, Tableau, SQL, Dbt Core, Microsoft Excel

## Education

Data Analytics Program, Career Foundry

Bachelor of Arts, University of New Mexico
